Early rising leads to health and happiness. The man who rises late can have little rest in the course of the day. Any one who lies in bed late is compelled to work till a late hour in the evening. He has to go without the evening exercise which is so necessary for his health. In spite of all his efforts his work will not produce as good result as that of the early riser. The reason for this is that he cannot take advantage of refreshing hours of the morning. Some people say that, the quiet of midnight is the best only when they burn the midnight oil. Yet it is true to say that few men have a clear brain at midnight when the body needs rest and sleep. Those who work at that time soon ruin their health. Bad health must in the long run have bad effect on the quality of their work.

1. What advantages does an early riser have ?
2. How does the man who rises late suffer ?
